

PRODUCT SPECIFICATION

IMMEDIATE ACTION AFTER SPRAYING WITH SAVO AGAINST MOULD AND MILDEW.

This product is efficient against: microscopic filamentous fungus and algae and on indoor and outdoor areas. It is used for liquidation of moulds on the walls, tiles, grout and silicone around baths, basin, shower, toilets, kitchen units, windows, basement, garage, wood etc.. The product does not have a preservative effect. It bleaches.

DIRECTION FOR USE: At the front side turn the nipple a quarter. Spray affected areas from a distance of 10-15cm. Hold base of bottle whilst spraying. Leave for 15-20 minutes, then wash the treated area with a sponge and warm water, or let it dry naturally. Do not attempt to remove mould before spraying to avoid the spread of dangerous spores. If the product is used correctly the mould will be liquidated, and the dark spots will disappear. In case of heavy contamination repeat the procedure. Turn the nipple a quarter backward (stop=blocking position). Ventilate well during and after use. Avoid contact with your clothes. Do not use for metals, wash them immediately.

WARNING: Do not mix with any other products. It could release dangerous gases such as chlorine. It is advisable to use protective gear (goggles, gloves, mask). Use biocides safely. Always read the label and product information before use.

R 31 Contact with acids liberates toxic gas.

R 36/38 Irritating to eyes and skin.

S 2 Keep out of the reach of children.

S 23 Do not breathe spray.

S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

S 28 After contact with skin wash immediately with plenty of water.

S 46 If swallowed, seek medical advice immediately and show this container or label.
